BASE6 DRL (DAYTIME RUNNING LIGHT)

The Base6 Daytime Running Lights units are a small versatile light that can be mounted in places where most others cannot. It is very slim and has a fantastic light output. Stainless steel mounting brackets and screws are included in the package. Pulse width modulation (PWM) is a trait of a quality work light. The circuitry switches the LED's on and off at a rate much higher than the human eye can observe. This cycling ensures each chip is working to it's optimum. The benefit is the Light output is the highest possible, whilst running cooler and using less power. Base 6 have built a reputation for producing high quality LED products that will stand the test of time. The use of quality materials, excellent R & D, attention to detail and quality assurance ensure your investment will provide years of trouble free use. We back this with a 5 year warranty for your piece of mind. The range includes Lightbars, Driving Lights, Emergency products and much more.

Chip Type	COB
Dimming Feature	Yes
Voltage	9-32VDC
Current Draw	6 Inch 0.4 amps @ 12.5V, 8 Inch 0.7 amps @ 12.5V
Length	6 inch, 8 inch
IP Rating	IP68
Working Temperature	-40°C to 50°C
Vibration (G)	8.6
