

ECOAASM Installation & Wiring Instructions

- Voltage 10-30V DC
- 144mm diameter x 94mm high
- 24 Amber LEDs
- Operating Temperature -40°C-+65°C
- Waterproof IP67
- Warranty 3 years
- Approvals: EMC ECE R10 / SAEJ845 Class 2

Wiring Connections:

- Connect positive power (+) to the red wire.
- Connect negative earth (-) to the blue wire.

To change Flash Pattern:

With power and earth connected and active touch the Green wire to power for 1 second, flash pattern will change to next in sequence.

There are 3 flash patterns available:

- Rotating
- Quad
- Single

Once required flash pattern is selected insulate the green wire to prevent any further contact.
