

9 Inch HEX Series off-road Dual Colour Driving Light

Next-Generation Reflector Technology

Our newly redesigned reflector cup features an enhanced reflection angle, ensuring you get the most out of the powerful LEDs inside. This upgrade delivers unparalleled luminosity, providing bright, focused light to tackle even the darkest trails.

Tough as Nails Construction

Built to handle the toughest Aussie conditions, the virtually indestructible PC lens won't fade or yellow over time. The powder-coated die-cast aluminium housing is corrosion and rust-resistant, giving you peace of mind whether you're hitting the dusty tracks or the harsh coastal elements.

Easy Installation, Plug & Play

Designed for convenience, these LED Driving lights come with stainless steel bolts for quick and simple installation. Rubber pads help eliminate vibration, while DT plugs allow for a hassle-free, plug-and-play setup, so you can get back on the road faster.

TECHNICAL INFO.

LED POWER	141W
VOLTAGE	9-36v
BEAM DISTANCE	1 LUX @ 678.5m
CURRENT DRAW	10.7A @ 13.2V
OUTPUT	13517 Lumen (Each)
BEAM PATTERN	Combination Beam
HOUSING	POWDER-COATED DIE-CAST ALUMINIUM
IP RATING	IP68 & IP69K

Heavy-Duty Mounting Bracket

Made from high-pressure die-cast steel, the mounting bracket is engineered to endure even the roughest terrain. Ribbed in all the right places to absorb vibration, this sturdy bracket won't fatigue, ensuring it stands up to the test of time, even on the roughest Aussie corrugations.

Waterproof and Rugged Protection

With a waterproof rating of IP68 & IP69K, these driving lights are built to withstand extreme weather and wet conditions. Its screw-free structure helps prevent water seepage, ensuring reliable performance in all kinds of harsh environments.

Upgraded Heat Sinks & Pressure Equalisation Vent

The dense aluminium heat sinks are designed for efficient heat dissipation, extending the lifespan of your light up to 50,000 hours, so you can count on reliable performance for years. Additionally, the built-in pressure equalisation vent balances internal and external pressures, protecting your light from damage caused by air and water pressure changes, even in the harshest conditions.

WATERPROOF PROTECTION

Precise screw free structure effectively resists the risk of water damage makes it impervious to harsh conditions.

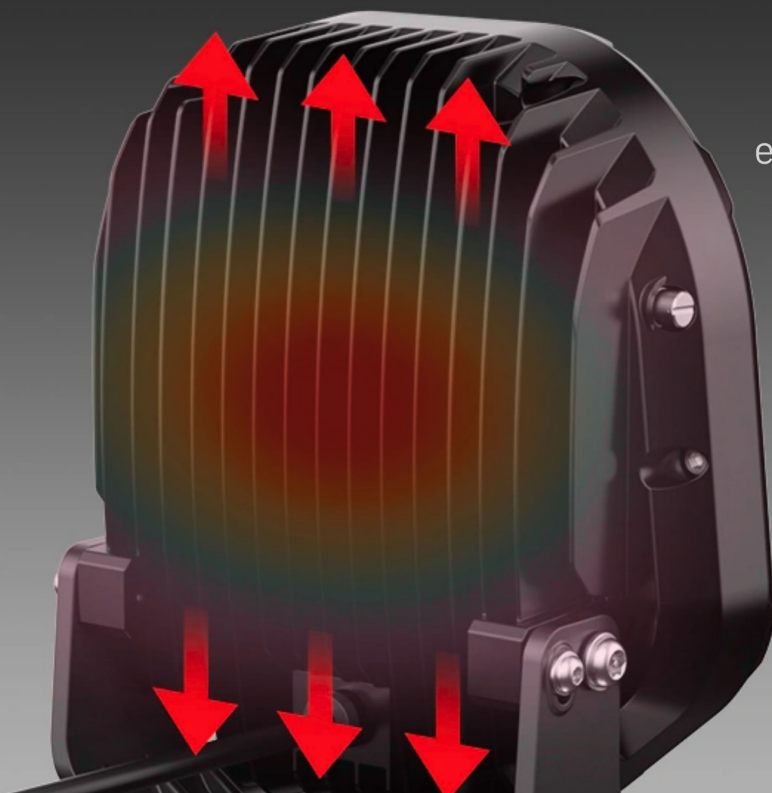

Waterproof rating up to IP68&IP69K

UPGRADED HEAT SINKS

Dense aluminum heat sinks ensure rapid heat dissipation, extending the lifespan to 50,000 hours.

Includes a pressure equalisation vent for optimal performance.

TOUGH CONSTRUCTION

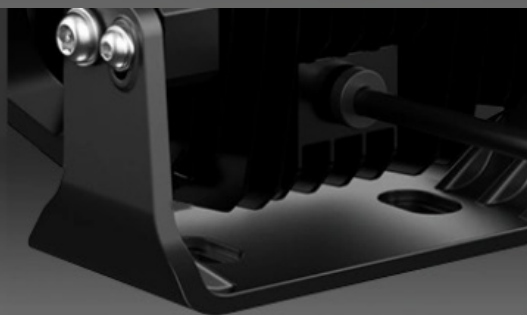

The virtually indestructible PC lens resists fading and yellowing, while the powder-coated die-cast aluminium housing is corrosion and rust-resistant.

NEW GENERATION REFLECTOR

The redesigned BASE6 reflector cup optimizes the reflection angle, maximising LED output for unmatched luminosity.

EASY TO INSTALL

Three-bolt stainless steel mount ensures easy installation.

ADJUSTABLE DESIGN

The durable stainless steel mounting bracket can be easily adjusted, allowing you to direct the light precisely where it's needed most.

PLUG & PLAY

Supplied with DT plugs for quick and convenient installation

HEAVY DUTY MOUNTING BRACKET

Engineered with precision, this driving light features a robust, high-pressure die-cast steel housing, a true marvel of durability. Its expertly ribbed design optimizes strength, ensuring zero vibrations and preventing material fatigue, even under the harshest conditions. Built for resilience, this light is designed to endure prolonged operation, consistently delivering top performance, time after time.
