12-24V****Duel Colour
- B6SL1-3AW****Single Colour
- B6SL1-3W**

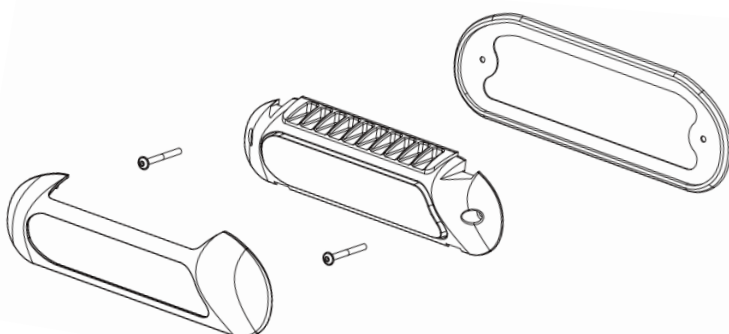

DESCRIPTION.

Introducing the SL1 Scenelight Series by BASE6, these innovative work lights are designed with a 45° light angle, featuring a sleek aesthetic. Engineered with the latest cutting-edge CREE LED chips, both of the SL1 Series scenelights deliver a powerful, ultra-wide 120-degree beam.

The SL1 is offered either as a single colour scenelight or our dual colour option that allows you to switch between cool white and amber. The cool white light maximises brightness, while the amber light reduces the presence of bugs by up to 90%, making it ideal for use in areas related to food preparation and dining.

TECHNICAL INFO.

LED POWER OUTPUT	1.5W LEDs
EFFECTIVE LUMENS	3030LM / 1046LM
RAW LUMENS	4500LM / 1800LM
OPERATING VOLTAGE	12v & 24v Compatibility
OPERATING TEMPERATURE	-40°C - 60°C
IP RATING	IP69K
COLOUR TEMPERATURE	5700K
MATERIAL	Aluminium Housing
LENS	PC Lens (UV Resistant)
MOUNT AND FITTINGS	Screw Mount, Gasket
BEAM TYPE	Scene Light 45° Down
LIFE SPAN	50,000 Hours
AMP DRAW	1.8 Amps @ 12v (2.3A Both)
CERTIFICATIONS	CE, CA, CISPR 25 Class 4 ECE R10, R23, E57

ITS IN THE DETAILS.

These units can be securely installed virtually anywhere, from roof racks, canopies, or caravans, providing supplemental lighting for activities such as reversing, off-road visibility, camping, or working around your vehicle.

The 45-degree angled beam ensures optimal utilisation when mounted at elevated positions, eliminating any wasted light output. With an impressive IP69K ingress protection rating, these work lights are built to withstand challenging conditions, including dust and water exposure.
